'Maintain drainage system to avoid floods in Melaka'

MELAKA: The Melaka government has called on parties involved to cooperate in maintaining the drainage system according to schedule to ensure major floods do not occur, especially during the monsoon season. State Public Works, Transport and Public Utilities Committee chairman Datuk Mohd Sofi Abdul Wahab said local authorities, district offices, Village Community Management Councils, the Public Works Department and the Drainage and Irrigation Department, despite having different roles, could work together more effectively. "We hope all parties will adhere to standards and regulations (on drainage system maintenance) according to schedule as we know floods occur if drains and rivers are not maintained."
