# 82% of TNB staff fully vaccinated

**KUALA LUMPUR:** Tenaga Nasional Bhd (TNB) said 82% of its some 35,000-strong workforce in Peninsular Malaysia and Sabah have been fully vaccinated in its effort to help the country curb the spread of the Covid-19 pandemic.

According to its statement yesterday, the comprehensive inoculation for its staff is one of its top priorities as a majority of them are frontliners in the energy supply chain, working to ensure the stability of electricity supply during the movement control order.

TNB's operations are classified as essential services to ensure stable electricity supply to strategic locations such as hospitals, health clinics, vaccination and vaccine storage centres.

TNB has implemented an internal campaign to encourage its staff to register and get vaccinated under the National Covid-19 Immunisation Programme, said TNB president and chief executive officer Datuk Baharin Din in a statement.

He added TNB is also working together with federal and state authorities to ensure its workforce at the frontlines are vaccinated as soon as possible.

"We have achieved herd immunity among our workforce due to the success of an internal campaign. They voluntarily registered to be vaccinated.

Baharin said only its vaccinated staff are allowed to work on site, and all staff are encouraged to work from home. – Bernama
