Rangers capture 1.8m croc in KK

KOTA KINABALU: A 1.83m-long crocodile has been captured in a residential area here.

According to the Wildlife Rescue Unit (WRU) Facebook page, it received a call from a resident, Rodmen Lim, on Friday morning, who told the unit that his mother had seen a crocodile in the bushes near his house.

When wildlife rangers arrived in the afternoon, they tried searching for the reptile but it was nowhere to be found.

They left and asked Lim to alert them again if he saw the creature.

Lim called back in the evening after noticing the reptile nearby.

Rangers arrived at 7.55pm and caught the crocodile before it could escape.

The crocodile was taken to the Wildlife Rescue Centre in nearby Potuki before they released it back to a suitable habitat.
