Water supply disruption in Seremban, Port Dickson

SEREMBAN: Several areas in the district here and Port Dickson will experience water supply disruption due to the closure of the Sungai Linggi water treatment plant. Syarikat Air Negeri Sembilan Sdn Bhd public relations officer Norzita Ismail said the closure followed an oil spill at Sungai Linggi. "The cessation of the water treatment process at the plant is expected to take a long time to facilitate treatment of the contaminated water supply. This will result in disruption of water supply to areas in Seremban and Port Dickson," she said yesterday.
